## Model matching and technical documents

The poster states 3508 and identifies this unit as gas-fuelled. The exact engine prefix/suffix and package serial number have not been supplied.

Manufacturer G3508-family material is a comparison reference only, not confirmation that this unit is G3508A or any other specific variant.

Voltage, frequency, power factor, kW output, duty rating, gas quality and pressure, fuel consumption, dimensions and weight require unit-specific verification.

Request readable engine and alternator nameplates, service history and an agreed inspection / load-test report before purchase.

### Official family reference (not matched to this unit)
